\*Students planning to add a Computer Science (CS) minor should take CS 1400 and 1410 in place of COMP 1010 and COMP 1020. Replace MATH 1030 with MATH 1210. Visit CS.UTAH.EDU for CS minor details.

If 15 credit hours a semester is too much, students should take summer courses to ease the fall & spring semester schedule while staying on track for 4 years.

\*\* Additional credits may be needed to reach 122 credits for graduation if a student combines general education courses (ex: one course to count for HF and IR).
